

DIGITAL MANUFACTURING TRAINING

SolidWorks 3D CAD for Manufacturing
 SolidWorks Model Based Definition
 SolidWorks Inspection
 SolidWorks CAM Std. & Pro.
 CAMWorks 3 Axis Training, Mill-Turn, Multi-Axis
 SWOOD CAM
 GOM Inspection Std. & Pro.
 Custom Training Courses

PROGRAMMING

Custom Post Processors
 CAM Automation
 Tech DB Setup

DIGITAL EXPERIENCES

Augmented & Virtual Reality
 Workcell
 eCommerce
 Robotics Simulation

MANUFACTURING

3D Printing
 3D Scanning
 Optical Metrology
 Topology Optimization
 FEA Simulation
 CFD Simulation

SYSTEM IMPLEMENTATION

3D Experience Platform
 SolidWorks PDM
 IQMS - DelmiaWorks

-  *Training Delivers Peak Performance*
-  *Maximize your ROI with Certified Training & Implementation*
-  *Ask us about Canada - Ontario Job Grant Program*

ABOUT US

Founded in 1984, CAD MicroSolutions is a recognized and reputable 3D solution provider in Ontario, passionate about helping our clients design, disrupt, innovate and succeed. We have been providing engineers, designers and manufacturers with 3D technology and training for the entire product development life cycle for over 30 years. We've entered the 4th industrial revolution; digital technology is transforming the manufacturing industry, requiring manufacturers to be agile, innovative, and to make informed investments to remain competitive in an exponentially growing market. With over 30 years of experience in the industry, we are uniquely positioned to help companies of all sizes and in all spaces to make informed technology investments and leverage their existing CAD data in more ways than one.

Our team of certified professionals provide consultation, sales, training and support for SOLIDWORKS, Additive Manufacturing (HP, Markforged, BigRep, Formlabs, Ultimaker and Nano Dimension), GOM 3D Metrology & 3D scanning, as well as Immersive Display technologies.

We provide complimentary consultation on the full range of products and services we offer, and would love the opportunity to help you and your business.

*3D CAD Design Solution
