

SOLIDWORKS PLASTICS

OBJECTIVE

For companies that design plastic parts or injection molds, SOLIDWORKS® Plastics helps users predict and avoid manufacturing defects during the earliest stages of part and mold design, eliminating costly mold rework, improving part quality, and decreasing time-to-market.

OVERVIEW

SOLIDWORKS Plastics offers computer-aided engineering (CAE) simulation tools that predict how melted plastic flows during the injection molding process—the manufacturing method used to produce more than 80 percent of all plastics products. The ability to predict how the plastic will flow allows the prediction of manufacturing-related defects. By being able to predict these defects, users can change mold geometry, processing conditions, or the plastic material used, to minimize potential defects, thus saving energy, natural resources, time, and money.

BENEFITS

- **Avoid Hidden Costs:** SOLIDWORKS Plastics products can be used to optimize part wall thickness, gate locations, runner system size, and layout to ensure the mold works right the first time, reducing or eliminating the need for rework.
- **Reduce Manufacturing Defects and Scrap:** SOLIDWORKS Plastics makes it easy to analyze design iterations at the earliest stages of product development—when the cost of change is lowest and the impact on manufacturability is greatest. This improves part quality and minimizes scrap rates.
- **Reduce Time-to-Market Delays:** SOLIDWORKS Plastics helps to predict and avoid potential manufacturing defects before any mold tooling is cut, virtually eliminating the need for time-consuming and costly mold rework and ensuring project deadlines and ship dates are met on time and within budget.
- **Avoid Inefficient “Islands of Automation”:** SOLIDWORKS Plastics provides automated report generation tools that facilitate the sharing and interpretation of simulation results, allowing increased collaboration among development teams at different sites.

CAPABILITIES

SOLIDWORKS PLASTICS STANDARD

SOLIDWORKS Plastics Standard is easy-to-use plastics injection molding software that guides part designers through the process of optimizing their part designs, improving part quality, and decreasing time-to-market.

SOLIDWORKS PLASTICS PROFESSIONAL

SOLIDWORKS Plastics Professional guides mold designers and moldmakers through the process of optimizing their designs, eliminating costly mold rework.

SOLIDWORKS PLASTICS PREMIUM

SOLIDWORKS Plastics Premium guides mold designers and mold-makers through the process of optimizing their designs, analyzing injection mold cooling line layouts, and predicting molded part warpage. Not all capabilities are available in every package or for all studies.

SOLIDWORKS DESIGN SUPPORT

- Native SOLIDWORKS files
- Associative with SOLIDWORKS geometry
- Fully embedded in SOLIDWORKS 3D CAD

GENERAL ANALYSIS AND MESHING

- Automated mesh generation
- Guided mesh creation and analysis setup
- Global and local mesh refinement controls
- Solid 3D mesh
- Boundary mesh (shell)

MOLD GEOMETRY SUPPORT

- Runner Design Wizard
- Sprues and Runners
- Hot and Cold Runners
- Multicavity Molds
- Family Molds
- Cooling Lines
- Baffles and Bubblers
- Conformal Cooling Channels
- Mold Inserts
- Runner Domain Category

RESULTS (PARTIAL LISTING)

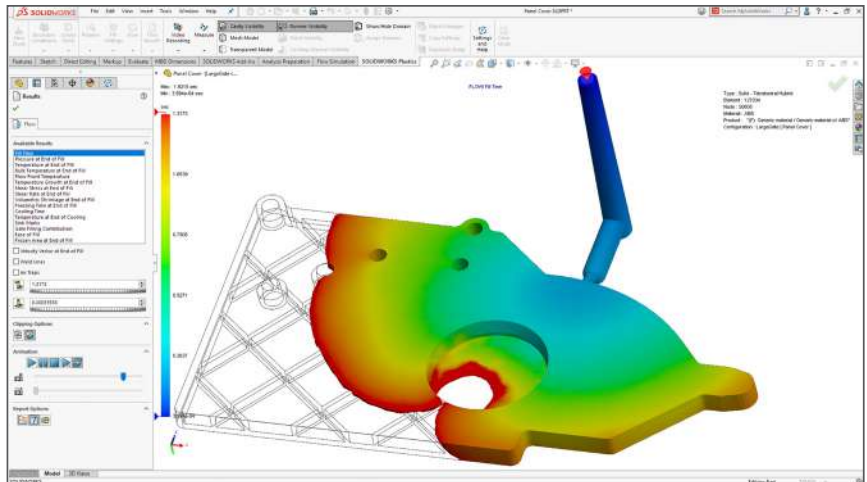

- eDrawings® Support
- Fill Time, Ease of Fill, Results Adviser
- Nominal Wall Thickness Adviser
- Pressure Profile
- Part and Mold Temperature Profiles
- Shear Rate
- Cooling Time
- Weld Lines, Air Traps, Sink Marks, Sink Mark Profiles
- Frozen Layer Fraction
- Clamp Force, Cycle Time
- Volumetric Shrinkage
- Displacement (part warpage)
- Export to ABAQUS®, ANSYS®, Digimat®

PLASTICS MATERIAL DATABASE

- Extensive thermoplastics, mold material, and coolant databases
- Material database customization

SIMULATION CAPABILITIES

- Filling Phase
- Packing Phase
- Cooling Analysis
- Warpage Prediction
- Recommended Gate Location(s)

ADVANCED SIMULATION CAPABILITIES

- Part Insert Overmolding
- Multi-Shot Overmolding
- Fiber Orientation Analysis
- Valve Gates
- Venting Analysis
- Mold Inserts
- Gas-Assisted Injection Molding
- Co-Injection Molding
- Birefringence
- Reaction Injection Molding
- Conformal Cooling Analysis
- Warpage Analysis

LANGUAGE SUPPORT

- Czech
- English
- French
- German
- Italian
- Japanese
- Korean
- Polish
- Portuguese
- Russian
- Simplified Chinese
- Spanish
- Traditional Chinese
- Turkish

Our 3DEXPERIENCE® platform powers our brand applications, serving 11 industries, and provides a rich portfolio of industry solution experiences.

Dassault Systèmes, the 3DEXPERIENCE® Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 250,000 customers of all sizes in all industries in more than 140 countries. For more information, visit www.3ds.com.
