

Software Update | Form 3+ & Form 3B+

Thank you for ordering a new Form 3+ or Form 3B+ Formlabs SLA 3D Printer. When unboxing your printer, you may see some references to Form 3 or Form 3B on the back label of your printer or on the printer's touch screen. Rest assured that you have a Form 3+ or Form 3B+ printer. To confirm this, look for a plus symbol in the bottom right corner of the Serial Name sticker on the back of your printer.

For your printer to correctly identify as a Form 3+ or Form 3B+ and to take advantage of the improved print speeds, surface finish, and reliability that the Form 3+ and Form 3B+ offer, simply download the latest version of PreForm and update your printer firmware.

Downloading the Latest Version of PreForm

To download the latest version of PreForm, visit formlabs.com/software and download the version appropriate for your system.

Installing the Latest Firmware

To download the latest firmware version and install the firmware file on your printer, select your printer in File > Devices within PreForm and use the Update button in the resulting dialog box. Visit support.formlabs.com for more detailed information.
