

WHAT'S NEW IN SOLIDWORKS® 2024—PDM

1 Improved Visual Content

- Graphically view component data such as workflow state from within SOLIDWORKS, with assembly visualization.
- Quickly identify weldment cut-list components with specific icons.

Benefits

Get a clear at-a-glance view of important data and system information.

2 Increased Data Protection and Tracking

- Protect reference information in Contains and Where Used—now hidden if the user doesn't have access to the referenced file.
- Check out and Undo check out actions are now displayed in the file history.

Benefits

Improve data security with additional audit trail information.

3 Simplified Access to System Data

- Easily find information about locally cached files in the Windows® Explorer Version tab, including Last historic workflow, Last historic state, and Days in state.
- Quickly access the additional system information in SOLIDWORKS via the Task Pane.

Benefits

Access file version and system information at your fingertips.

4 Improved Performance

- Experience faster response times when performing common operations, such as adding files, checking in, changing state, and using Copy Tree.

Benefits

Get work done faster, with less waiting, when performing common operations.

5 Streamlined Change State

- Increase productivity by optionally checking out files during a workflow transition.

Benefits

Reduce mouse clicks and start working sooner.
