

## WHAT'S NEW IN COLLABORATIVE DESIGNER FOR SOLIDWORKS®

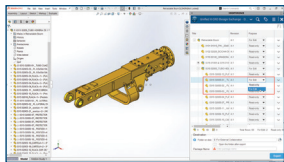

### 1 Flexible Revisioning Scheme

- Ease product development revision control while strengthening data governance with the ability to choose from new flexible revision formats.
- Utilize primary and secondary levels of revision-enabling component A.1 on revising to become A.2.

#### Benefits

Meet your engineering standards and avoid confusion with an improved revisioning scheme.

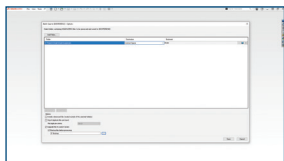

### 2 Data Exchange With External Suppliers

- Collaborate faster with people outside of the 3DEXPERIENCE® platform with the ability to share an entire design project using a simple command from within SOLIDWORKS.
- More easily share data with external stakeholders with 3DDrive integration.
- Control data integrity by setting permissions on your shared data.

#### Benefits

Easily and securely communicate with your external suppliers by providing relevant design data.

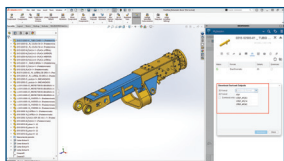

### 3 Batch Save – Bookmark Editor

- Manage and organize your newly saved data on the 3DEXPERIENCE platform seamlessly by defining a Bookmark to your content on Save.
- Classify data using a Bookmark structure that corresponds to the local folder organization while preserving the local folder structure.

#### Benefits

Save time when organizing your data with the ability to create Bookmarks during Save.

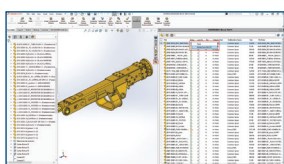

### 4 Derived Output Management

- Select the format before sharing your data with the ability to maintain consistent settings for derived outputs from the Admin console.
- Enable administrators to choose from formats like PDF or STEP for parts and drawings.
- Set up new derived output rules utilizing asynchronous or synchronous rule generation.

#### Benefits

Save time by using consistent settings defined by your administrator.

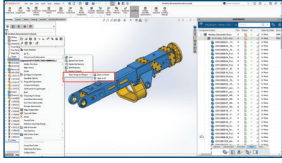

### 5 Local Cache Explorer

- Access and manage cached content directly from the Task Pane.
- Easily view and manage your local cache, and quickly drop images in the graphics area and delete them.

#### Benefits

Quickly access and manage your local cache.

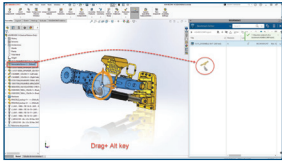

## 6 Design Sharing

- Easily share designs on your 3DSwym communities from within SOLIDWORKS.
- Enable community members to easily comment on models and provide immediate feedback to designers.

### Benefits

Improve collaboration by easily sharing designs with internal and external communities.

## 7 Drag and Drop From FeatureManager® Tree to 3DEXPERIENCE Platform

- Drag and drop components from the SOLIDWORKS Feature Tree to apps like Bookmark Editor within the 3DEXPERIENCE add-in.

### Benefits

Save time and streamline your component workflow with FeatureManager Tree integration.

## 8 File Assistant Tool

- Prepare files for bulk upload while resolving issues related to trailing spaces and duplicate file names with the new standalone tool.
- Continuously improve your upload workflows by adding additional checks, like missing references, missing configurations, short file names, 3D Interconnect component links.

### Benefits

Upload data faster with greater ability to prepare files and resolve issues.

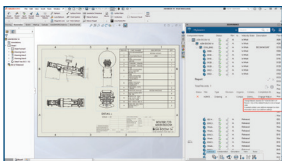

## 9 Welcome App

- Get started more quickly by accessing a list of apps recommended for Collaborative Designer for SOLIDWORKS users from a one-stop resource destination.
- View new onboarding videos for Collaborative Designer for SOLIDWORKS.
- Replay the welcome tour at any time by clicking the Welcome Tour button.

### Benefits

Enable an easy and fuss-free onboarding experience for your new users.

## 10 Drawing Maturity Transition Rule

- Reduce errors with the ability to release drawings only when all of their dependents have reached the same release maturity stage.
- Ensure integrity with the ability to promote drawings only if their children are in the same state or higher.

### Benefits

Improve your life cycle workflow with the ability to better manage drawing maturity transitions.

## Our 3DEXPERIENCE® platform powers our brand applications, serving 11 industries, and provides a rich portfolio of industry solution experiences.

Dassault Systèmes, the 3DEXPERIENCE Company, is a catalyst for human progress. We provide business and people with collaborative virtual environments to imagine sustainable innovations. By creating 'virtual experience twins' of the real world with our 3DEXPERIENCE platform and applications, our customers push the boundaries of innovation, learning and production.

Dassault Systèmes' 20,000 employees are bringing value to more than 270,000 customers of all sizes, in all industries, in more than 140 countries. For more information, visit [www.3ds.com](http://www.3ds.com).
